Notes *****	The amplifier should be turned off while changing the speaker cables, input RCA or XLR, gain switch to be toggled with the amp turn off. The user has to ensure that no spurious signals/oscillations' is injected in the Amplifiers input via preamplifier, streamers or other devices, good quality RCA & XLR cables are a must as this is a high-power amplifier and any inconsistency in signal levels will be amplified and may cause damage.
	The above-mentioned specifications are indicative only actual measurements may vary based on test equipment and test conditions.
